potato tuber moth—progress
report for July/August 1998**

TJB Herman

Project title: **Integrated pest management for potato tuber moth**

Contract No: **VPG502**

Business: **New Zealand Vegetable and Potato Growers Federation (Vegfed)**

Institute: **New Zealand Institute for Crop & Food Research (Crop & Food Research)**

Report for: **July 1998**

Stage 2 (October 1997 - September 1998)

When is potato tuber moth damaging potatoes? What natural mortality factors are affecting the population?

This month I have completed data collation and begun work on the end of year report (due at the end of September).

Other activities during August were:

- attending the New Zealand Vegetable and Potato Growers Conference in Christchurch;
- preparing and presenting a poster on control of potato tuber moth at the conference.

Tim Herman

Grower/Processor time in TBG project: Integrated control of potato tuber moth, July 1998

Date	Name	Task	No. hours
29 July	T. Moleta	discussion at conference	0.5
30 July	D.Fraser	discussion at conference	0.25
		TOTAL	0.75
Other			
processors liaising with growers (0.75+1.5+1.25)			3.5
Project team (10 reps)- Quarterly report (June 1998) @ 0.5 hour			5.0

Report for: **August 1998**

Stage 2 (October 1997 - September 1998)

When is potato tuber moth damaging potatoes? What natural mortality factors are affecting the population?

I am currently writing the end of year report due at the end of September.

Other activities during August were:

- attending some sessions of the NZ Plant Protection Conference in Hamilton (and also spending some research time at the Mt Albert Research Centre Library);
- ten days annual leave.
