EMISSIONS

The NZGAP Environment Management System (EMS) add-on empowers growers to meet market and regulatory environmental obligations alongside their usual NZGAP audit

- ✓ An accepted pathway for enable growers to meet local authority requirements for Good Management Practice (GMP) and reduce their environmental impact
- ✓ Available as an add-on for all NZGAP, NZGAP GLOBALG.A.P. Equivalent and GLOBALG.A.P. certified growers
- ✓ Simplifies complex environmental issues in the NZGAP assurance framework
- ✓ Enables growers to improve sustainability and measure their success
- ✓ Builds on the standards already applied by the grower
- ✓ Focused on outcomes of improved environmental performance
