

2024 Potato Tuber Moth

Potatoes NZ is working to help support growers in their management of Potato Tuber Moth (PTM). As part of this, we have a monitoring system using pheromone traps to catch PTM within potato crops. These results are multiple paddocks, averaged for the given area (Pukekohe, Pukekawa, Tuakau, etc.). Please use this information in combination with in-field crop scouting to help make decisions around crop management.

The overall PTM pressure across the region remains at 8 moth per day (from 8.4). See the table below for details.

Region	Count	Count last week
Onewhero	12	8
Patumahoe	7	12
Pukekawa	6	5
Pukekohe	8	15
Tuakau	7	2

Moth Catch Risk Range:

0-4 lower risk

5-9 moderate risk

10+ higher risk

F25 Regional Tuber Moth Survey

Tuber Moth catch per day by Region

Region ● Onewhero ● Patumahoe ● Pukekawa ● Pukekohe ● Tuakau

Regional Tuber Moth Survey - 09/12/24 (8th Reading)

Tuber Moth catch per day for Region (Out for 7 Days) ● 6 ● 7 ● 8 ● 12
