

The graph displays GDD Accumulation over time for various years and generations. The Y-axis represents GDD Accumulation from 0 to 550. The X-axis represents dates from 01-Jul to 04-Nov. The data series include Timaru 5 yr av (black dashed), T 20-21 (red solid), T 21-22 (cyan solid), T 22-23 (grey solid), T 23-24 (light blue solid), T 24-25 (dark blue solid), T 25-26 (orange solid), 1 Gen (black solid), 2 Gen (black dashed), 3 Gen (black solid), and 4 Gen (black dashed). The T 20-21 series shows the highest accumulation, reaching nearly 550 GDD by early November. The T 25-26 series shows the lowest accumulation, reaching approximately 470 GDD by the same date. The Timaru 5 yr av series is a dashed black line that follows a similar trend to the other series, reaching approximately 490 GDD by early November.
